ACCENTUS AI

— CONNECT. DEVELOP. ADVANCE. —

ACCENTUS AI LLC

CAPABILITY STATEMENT

Accentus AI builds evidence-governed intelligence systems for organizations where accuracy, security, provenance, and human accountability matter.

COMPANY OVERVIEW

Accentus AI is an applied AI and systems engineering company. We help government agencies and high-trust enterprises use artificial intelligence against authoritative information while preserving evidence, access controls, provenance, security, and human accountability. We don't ask organizations to simply trust what AI says. We design the information, evidence, security, and accountability architecture around it.

CORE COMPETENCIES

Evidence-Governed AI Architecture
AI systems whose outputs stay connected to authoritative sources, access controls, provenance, validation, human review, and audit evidence.

Document, Records & Information Intelligence
Turning documents, records, forms, contracts, email, scanned files, and legacy data into secure, discoverable, governed intelligence.

Search, Discovery & Knowledge Intelligence
Full-text, semantic, metadata, and relationship-based discovery, knowledge graphs, and AI-assisted research against authorized information.

AI Assurance & Governance
Controls built into the architecture: identity and authorization, model usage, sensitive data handling, output validation, and accountability.

Secure AI Integration
Integrating AI across hybrid Microsoft, AWS, Google, private, and government-authorized environments without vendor lock-in.

AI Modernization & Implementation
Use-case assessment, data and document readiness, pilots, integration, production deployment, testing, and operational support.

FLAGSHIP ARCHITECTURE

Federal Records Intelligence Platform (FRIP) — a secure, cloud-neutral architecture designed to help federal organizations manage, digitize, discover, analyze, and responsibly apply AI to government records. Principle: **Record First** — the authoritative record remains authoritative; AI output is derived intelligence.

FRIP is a solution architecture, offered for pilots and federal modernization efforts.

DIFFERENTIATORS

- Record first: AI never silently replaces the authoritative source
- Evidence attached to every material conclusion
- Technology-agnostic and model-replaceable architecture
- Principal-led delivery by named, credentialed personnel
- Governance designed in, not documented after deployment

SUPPORTING CAPABILITIES

- Data Engineering & Machine Learning
- Cloud & DevSecOps (FedRAMP / FISMA-aligned)
- Intelligent Automation, IDP & OCR
- AI Training & Workforce Enablement

CERTIFICATIONS & REGISTRATION

DC CBE Certified · SAM Registered · Active · Small Business

PARTNERSHIPS

NVIDIA Inception Program · Carahsoft Partner · ID 50683 · AWS Partner · Microsoft Partner
